POLAND

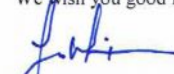

Dear Marek,

On behalf of the Swedish Maritime Administration I will hereby thank you a lot for the day as observer, 2012-05-08, onboard your vessel PASAT during the exercise Baltic SAREX 2012 in water north of Danish island Bornholm.

It was interesting and instructive to see your vessels during operation. The crew took advantage of modern equipment in a professional manner while acting with good seamanship. Rescue work was carried out according to modern Bridge Resource Management. Got a tour of the engineer who explained how the ship was built from a technical view.

Please extend our sincere thanks to all involved crew at PASAT for their efforts and for the successful arrangements.

We wish you good luck with successful rescue operation for next many years to come.

Johan Mårtensson

Swedish Maritime Administration - Search And Rescue department
